

AUSTECH

WIRE & CABLE

Austech streamlines operations with integrated cable solution

“Normal ERP systems fail to address the specific requirements of our industry. InnoVites delivered us a standard solution that matched perfectly with our requirements. It resulted in a quick and smooth implementation. And the commitment of InnoVites didn’t stop at the project closure. They continue to provide prompt and effective support”

Andrew Richmond, Operations Manager Austech

Austech Wires and Cables wanted to use IT to further optimize and streamline the processes in their company. With InnoVites for Cable, based on Microsoft Dynamics AX® Austech has achieved their business goals of higher transparency and efficiency of their operations.

Established in 1997, Austech is a privately owned cable manufacturer situated in Braeside, Victoria, Australia. Austech is equipped with state of the art technology to produce a wide range of wires and cables products at the highest quality standards. Austech serves the domestic and export market and strives to continuous improvement.

InnoVites technology wires Austech for continuous improvement

Austech invests in technology to become the best in terms of Customer Support, Product Innovation, Quality and Price. They made another step forward implementing the cable-specific ERP software from InnoVites. The project included the integration of the cable design system CableBuilder with InnoVites for Cable.

Perfect match results in smooth project

Austech selected InnoVites for Cable as it has been designed specifically for the wire & cable industry. The perfect match with the industry processes resulted in a smooth implementation project.

After the flawless go-live of the system, InnoVites for Cable streamlines the Austech business processes in sales, inventory, production and planning. Providing improved transparency and efficiency, InnoVites for Cable is the right platform for Austech to continue their pursuit for perfection.

Customer Profile

Customer	Austech Cables
Country	Melbourne, Australia
Industry	Cable manufacturing
Website	www.austechwire.com.au
Product	InnoVites for Cable, with integration CableBuilder

KEY BENEFITS

- Reduced stock levels by better inventory overview on spool level
- Elimination of human errors and improved availability of high-quality data in the company by integration design system CableBuilder and ERP
- Improved customer service by controlling length tolerances of individual cable lengths
- Minimized scrap by better length management in production planning and at shop floor execution
- Reduced inventory levels by length-based netting of available stock
- Better efficiency of sales team with powerful search of available designs and stock
